

ECON Healthcare and Moleac tie up — A “East Meets West” Collaboration

宜康医疗保健与Moleac - 中西结合, 对抗顽疾

Mr. Ong Chu Poh, CEO, China Healthcare Limited &
Mr. David Picard, CEO, Moleac Pte Ltd.

At ECON Healthcare, we take an ‘East meets West’ approach in the recovery process of our residents. As such, we are the only one in the commercial nursing home industry to have an in-house TCM clinic and physicians. In an effort to aid speedy recovery for our residents with stroke, we have collaborated with Moleac to offer a more comprehensive treatment.

This treatment comes in the form of NeuroAid™, a traditional Chinese medicine which has obtained listing as a Chinese Proprietary Medicine (CPM) from the Health Sciences Authority of Singapore (HSA) earlier this year, recognizing it as an aid in supporting neurological functions. The collaboration reflects a growing trend where traditional medicine is used in combination with western medicine for the treatment and management of a wide range of diseases.

中西医结合诊疗是宜康医疗保健的治疗特色。在私人疗养院行业当中, 宜康医疗保健是唯一设有传统中医诊所及长驻中医师针灸师的专业疗养机构。为帮助中风病人更快恢复, 宜康医疗保健和MOLEAC公司进行合作, 为病患提供更全面的中风康复疗程。

疗程中所采用的丹芪胶囊, 已获新加坡卫生科学局的批准, 可作为中成药销售。其主要功效为益气活血, 通络化痰, 提高神经机能, 从而改善中风病人的生活质量。宜康医疗保健与MOLEAC的合作反映了现有医学界的一个趋势: 广泛结合使用传统中药与西药, 来治疗疑难杂症。

NeuroAid™: supporting Neurological function

Neuroaid is a TCM Drug developed to aid recovery after stroke. Marketed internationally by Moleac, a bio-medical company, established since 2003. Neuroaid is developed from natural ingredients and has benefited around half a million stroke patients in China. From clinical trials performed with 800 patients in China, Neuroaid has shown high levels of safety and efficacy in improving stroke rehabilitation. It is now reaching about 200,000 patients every year in China.

While it is recommended to start Neuroaid early after a stroke, Neuroaid may also be able to boost recovery when taken at a late stage. Recovery is seen mainly in independence in daily activities and the reduction in motor deficits.

丹芪胶囊是天津中医药大学第一附属医院成功研制的传统中药, 成分天然, 安全可靠。现在由生物医药公司Moleac负责推向全球市场。临床试验证实, Neuroaid丹芪胶囊对中风病患能起着更快、更全面的康复疗效。每年超过20万名中国中风病人, 正在服用丹芪胶囊。研究结果显示, 中风后如能及早服用丹芪胶囊, 效果会较显著。就算是在患病晚期才开始服用, 丹芪胶囊依然有助促进中风病患的康复。

- Supports Neurological Functions
- Clinical efficacy established on Stroke patients rehabilitation in China
- Better independence in daily activities, reduction in neurological deficits
- Listed in Singapore as a Chinese Proprietary Medicine (CPM) with the Health Sciences Authority of Singapore (HSA) with the indication to “support neurological functions”
